PROJECT

E-Commerce Website for Dessert Using Spring Boot (2024)

Developed an eCommerce site with CRUD features. Worked with a team to integrate Components. Technologies: Java, MySQL, Spring Boot, Thymeleaf.

Digital Seek (2023)

The project implemented CRUD operations for admin panel. This innovative solution aims to improve document organization and enhance user accessibility, providing a more intuitive interface and enhanced search functionality for easier retrieval and navigation of the library's digital publications. This was developed using HTML, CSS, Php, & MySQL.

Sop For Knowledge Management Department Physical Records Keeping (2023)

This guide is provided to explain the procedures and practices for handling files at Securities Commission Malaysia. The preparation of this guide is in line with the provisions of Section 25, 26, and 27 of the National Archives Act 2003 (Act 629).

Computer Lab Inventory System (2022)

The project is developed in C# using WinForms. It is designed to help UiTM Puncak Perdana manage their computer lab inventory by providing features such as stock tracking.

RFID Lock Box (2021)

A final-year project uses Arduino software 1.8.9 to configure all components. The RFID lock box has a high- capacity detector, fast and accurate information with advanced technology by adding some features, for example ESP-32 Camera Web. This box function is to store valuable items. It uses high technology that enables the user to minimize the time of opening RFID Lock Box.
